

Weekly Report

07/06/2015 - 07/12/2015

Jing XIA

July 12, 2015

1 Summary

This week I mainly focus on the TopK project - implementation of the user study system.

2 Projects

2.1 Project 1 - DataScanner1

-

2.2 Project 4 - TopK Project

I implemented a user study system for the topk project last week. Questions are re-designed and the completion time will be recorded. The user data will be collected and stored at the server end. To be specific for the rank series trend task, users will click on the time parallel coordinate-like plot to draw the curve. In this way, it's more precise to compute the difference between users' answers and the actual curve, and thus to evaluate their performance. I've uploaded the system to a cloud9 platform so that users can access the system anywhere.

3 Paper Reading and Miscellaneous

-

4 To Do List

1. Revising TopK paper.
2. Attend ChinaVis and give presentation.
